

Do you ship medication internationally?

Tom Parks - 2025-02-25 - [Delivery](#)

Following Brexit, shipping medication to some countries is now challenging. Whilst we can ship medication internationally, many countries will refuse to let it through customs. Those that do often charge high fees before they will allow the parcel to be delivered.

It is always a risk to courier medication outside the UK. This is due to each country's customs and laws. We will assist best where we can and can do so.

If there are any delays, returns or destroyed medication please note that we cannot issue any refunds.

Countries we cannot ship to, as we have had deliveries previously refused, are

- Croatia
- Germany
- Slovakia
- Italy
- Denmark
- Portugal
- Spain
- Sweden
- Belgium
- Finland
- Netherlands
- Romania

Please check with us by email to info@rosewaylabs.com before placing an order or booking an appointment, to ensure that we can deliver to your country.
