What do I do if my prescription has expired?

Tom Parks - 2025-02-20 - [Prescriptions](#)

If you want to place an order but your prescription has expired, you will need a new prescription. Get in contact with your clinic to get a new prescription issued.

If you obtained your prescription through a consultation with our prescriber, you can book a new consultation [here](#).

In an emergency, we can issue a small emergency supply of medication. See [Can I get an emergency prescription?](#)
